About me:

Web Design:

For design, I write HTML5 and CSS3. - a CSS extension. For those interested, the text editor I use is Coda Sublime Text, I use it along side WAMP to build sites locally. These are the basic tools I use on every job and are my daily set up. I'm also learning Javascript and JQuery.

When time permits I like to create Bootstrap themes to earn a bit of extra pocket money and keep my skills fresh.

I'm currently available for work and taking on new projects, so please contact me.

Motion Graphic:

I am a freelance animator/designer with a passion for fun, challenging motion design work. With more than a four of experience, I have worked with a wide range of clients.

I attended the Chandigarh University where I received a Bachelor in science in Animation & Multimedia.

Films:

Since Childhood, I had a great fasination towards photographer and DOP's. In order to follow my passion, I bought Camera and starting clicking picture. In university, I discovered the rules and way to operate the camera.

I have made few short films on the base of concept which I believe in and got awarded as a best short film in University.
